# About Page

## Mission

My mission is to formally document revelatory Intelligence, in order to chart its process and progress, and to update the public in the growing revelation that creates gateways of perception unto the tangible animation of the prophetic word.

## Vision

My vision is to chart the possibility of the supernatural and create gateways of innovation and thought leadership, giving tangibility to what no eye has seen or ear heard.

## Values

My values for this mission are rooted in the unification of the natural and the supernatural, the unification of mind and spirit, science and supernatural phenomena, in the expression of truth and wonder.

# The Measure of God through Mathematics, String Theory, Resurrection Symmetry

## Introduction

---

*This is a revelatory dream I had March 24th, 2022.*

*My revelatory and interpretive approach are non conventional as this dream felt beyond the confines of my usual dream interpretation language.*

*In this report I seek to break down the facets of the Symmetry of God in His voice expressed in the language of Mathematics, Quantum Physics, and Resurrection language.*

*Previous to the dream the subjects of Group Theory, J Function and Moonshine Theory were unbeknownst to me. The research was stirred by revelation.*

*All bibliography is listed at the end of the report.*

---

## Scriptural Focal Point

"For creation waits with eager longing for the revealing of the sons of God. For creation was subjected to futility, not willingly, but because of him who subjected it, in hope that the creation would be set free from the bondage to corruption and obtain the freedom of the glory of the children of God."

**Romans 8: 19-21**

---

# The Measure of God through Pure Mathematics, String Theory, Resurrection Symmetry

## Dream

In the dream I found myself outside during a cloudy day. I had a deep sense that there was something invisible there, and as soon as I discerned that, I saw a white orb that looked like a full moon floating in mid air. It had a slight shadow behind it, and it was moving.

I had a deep impression that I was supposed to watch carefully and observe this moon intently. It began to move, and I followed it with my eyes and with my feet. Suddenly a cave opened up in the earth. I went into the cave, and realized it was an empty grave. I was reminded of the empty grave on Resurrection Sunday when Jesus rose from the dead.

I looked at one of the walls on the cave and I was surprised to see a group of numbers in 2 columns and 3 rows. The first two rows and both columns of numbers were interacting with one another, as if they were reflecting or mirroring each other, although the numbers themselves weren't exactly the mirror reflection of one another. These numbers were moving and almost walking through one another.

## Continued

This is the list of the numbers in the order in which I saw the

32 43

33 42 and 44 appearing in and out of the midst of the numbers.

17 ?

The numbers according to their grouping would move side to side and up and down and within.

As I watched these numbers, a man walked into the grave, his name was Jay. I asked him why he was here, he replied. " I saw a white paper floating, and the supernatural drew me here. He then took his camera out and took a picture of the wall with the numbers moving. After this we both left the cave and went on our way.

## Waking

After waking up, I was deeply impressed with this unusual dream.

There was something about the numbers, that was peculiar. I felt that although I could look at each of these numbers as a symbol of something, I knew that the main interpretation was not in that realm of symbology, but rather in its system.

I had a prompting to add the first 2 rows and columns which equaled 194. The third row had the number 17 and a mystery number (one I couldn't fully recall)

In Mathematics the number 194 is the number of irreducible representations of the Monster group.

## Monster Group

What is a Monster Group?

“In the area of abstract algebra known as group theory, the monster group M (also known as the Fischer–Griess monster, or the friendly giant) is the largest sporadic simple group.”

Wikipedia

Let me break down Group Theory for you and what it does.

“The study of algebraic groups like the monster helps make sense of the mathematical structures of symmetries, and hidden symmetries offer clues for building new physical theories. Group theory in many ways epitomizes mathematical abstraction, yet it underlies some of our most familiar mathematical experiences.”

Quanta Magazine

In essence the Monster group is a very large Algebraic object that has a total of 196,883 dimensions.

As I processed this information, and studied in greater depth this group it became clear that the dream I had had was pointing in the direction of Group Theory

But what was God saying? Hang with me for a few more minutes!

## The Number 17

Now the number 17 in the dream had to do with the Physics domain, as there are 17 elementary particles in the Standard Model of Physics. Additionally there was a mystery symmetry, another number that was concealed from my memory, hinting to what is beyond the framework of the Standard Model of Physics.

## The Moon

The moon or rather the symmetry of the sphere in my dream was what brought me into the revelation of the numbers. What did this symbol mean? Again, I knew it was much more than what an ordinary lunar symbol is in a dream, I needed to go beyond my preconceived notions of dream interpretation and press into another level of interpretation.

As I delved deeper into studying the Monster Group, I discovered another facet of this group called the Moonshine Theory or Monstrous Moonshine.

“The monster group is one of two principal constituents in the monstrous moonshine conjecture by Conway and Norton,[14] which relates discrete and non-discrete mathematics and was finally proved by Richard Borcherds in 1992.”

It is said that “Many mathematicians, including Conway, have seen the monster as a beautiful and still mysterious object.[15] Conway said of the monster group: "There's never been any kind of explanation of why it's there, and it's obviously not there just by coincidence. It's got too many intriguing properties for it all to be just an accident." [16] Simon P. Norton, an expert on the properties of the monster group, is quoted as saying, "I can explain what Monstrous Moonshine is in one sentence, it is the voice of God.”

## Moon Continued

The Moon in my dream along with its mathematical representation in Moonshine Theory was an expression of the Voice of God. The voice of God moving in perfect in symmetry trans-dimensionally filling the space of a grave and calling forth resurrection power and reality.

## Why is this called Moonshine Theory?

The term "monstrous moonshine" was coined by Conway, who, when told by John McKay in the late 1970s that the coefficient of (namely 196884) was precisely one more than the degree of the smallest faithful complex representation of the monster group (namely 196883), replied that this was "moonshine" (in the sense of being a crazy or foolish idea).[b] Thus, the term not only refers to the monster group  $M$ ; it also refers to the perceived craziness of the intricate relationship between  $M$  and the theory of modular functions.

IT IS CALLED MOONSHINE BECAUSE OF ITS WILD CONNECTION-BEYOND COINCIDENCE.

## Jay- Interpretation

There is a strange connection between the Monster Group and String Theory which is one of the postulants for the Theory of Everything.

The Modular functions that creates this strange relationship between the Monster Group and String Theory is called the J function- hence the man Jay in my dream.

In the late 1970s, the mathematician John McKay noticed that 196,884, the first important coefficient of an object called the  $j$ -function, was the sum of one and 196,883, the first two dimensions in which a giant collection of symmetries called the monster group could be represented.

As pointed out by one of my colleagues, Mark Eaton, Jay also comes from the root word/name Gaius which is the feminine of Gaia which represents metaphorically speaking the life force of the earth.

In other words, perhaps it is the groan of creation coming from the planet in a pure mathematical expression. Perhaps not completely native to only earth but its expression coming from deep within creation, drawn into a mathematical interface with The monster group (the voice of God) as a viable bridge of Resurrection power to potentially express a unification model of physics which connects into String Theory.

Perhaps there is more to this, perhaps there is more, beyond what we have believed possible with String Theory and what "the beyond" will entail.

But that remains to be revealed.

I am simply following the power of the Spirit of God, the math language, and the physics language to understand what He is saying.

## **Framework of Dimensions Within Dream**

In the dream there were 2 shapes that were represented (geometrically speaking) . One was a sphere and the other was a piece of paper which is a flat surface. One could think of these shapes as symmetries. Spheres are 3 dimensional objects, and flat surfaces are two dimensional representations.

I was observing the 3 dimensional representation of the unseen object and simultaneously the Jay (J- function) stepped into the scene drawn in by a 2 dimensional expression, as if it had been observing the same thing I had been observing but from a different two dimensional stand point and it was magnetized by the supernatural. We were both magnetized by the supernatural.

As mentioned earlier, the J function is the the sum of the first TWO DIMENSIONS represented in which a giant collection of symmetries called the monster group could be represented. Meaning the 2 dimensions the J- function was expressing was  $196,883 + 1$  its sum being 196,884 dimensions.

Albeit, this is an astronomical measure of symmetries to even conceive.

What does this mean? In the dream the J- function was functioning as an observer moved by a force. How can that be? Scientifically speaking I am not sure I can articulate it, but biblically I can.

“For the creation waits with eager longing for the revelation of the sons of God.”

Romans 8:19

Revelation is packaged differently depending on the observer but the revelation potential remains the same. If creation longs and expects, it has a view a hope for change and for a future.

The point being, that when interacting with the faith dimension of possibility, you are interacting with divine symmetries, it is the symmetries that draws the observer into the curious journey of observation to unlock the patterns and bring the unseen into the unseen, from hidden symmetry to manifested symmetry.

## The Shadow of the Moon

In the dream I was not only observing the moon but also its shadow, which brings me to the Umbral/ Shadow Moonshines. Umbral for those who are not aware means shadow.

Mathematician Miranda Cheng and her collaborators, “John Duncan and Jeff Harvey gradually teased out evidence of not one but 23 new moonshines: mathematical structures that connect symmetry groups on the one hand and fundamental objects in number theory called mock modular forms (a class that includes the  $j$ -function) on the other. The existence of these 23 moonshines, posited in their Umbral Moonshine Conjecture in 2012, was proved by Duncan and coworkers late last year.”

What is the significance of these 23 Umbral Moonshines?

They are tools that assist in the process of looking at the K3 string theory representation of spacetime.

K3 surface is a mathematical complex manifold.

Now that is a whole lot to take in, so let me give you a summary.

## Summary

Taking in the dream language of group theory, J function, moonshine theory and the empty grave, what is God saying through all this?

God is revealing the architecture of creation and faith unified in the groan for resurrection and freedom. Humanity groaning for the resurrection of their bodies, and creation groaning for the emancipation of its potential.

Additionally throughout the dream there is an open invitation to follow through in the observation of what you “feel or sense” is there, into truly unlocking it from the unseen, taking it from the "not yet understood" into the domain of accessible.

The voice of God is the sound of many waters, you can think of it as moving through its representations of hydroplanes (water planes) and poetic floods of expression longing to reveal the power of resurrection through the expression of a unifying theory of everything and the resurrection/regeneration expression in human biology. That inevitably encompasses a sanctified model of consciousness.

The voice of God is speaking the language of unification, drawing us into the sum of all things in heaven & all things in earth through Christ.

God is unlocking understanding of the branch of Pure Mathematics as a language and grid that expresses the wonder of God administering His glory to reveal the power of His Eternal Life in creation and humanity.

## Resurrection Symmetries

More than ever before we are recognizing that death is not how we were created, it is not God's measure or symmetry, and heaven is drawing our minds, imaginations, and dreams to connect with the dream of God that is the abundance of life. In like manner, creation is also aware of its destiny of in the freedom of God's life, and is looking expectantly for its emancipation.

“That the creation itself will be set free from its bondage to corruption and obtain the freedom of the glory of the children of God.”

Romans 8:21

Creation is longing to become a vessel expressing that syntropic system of divine life.

God is longing to reveal His image through us, His symmetry through us. Jesus is the perfect image of God. Jesus is the perfect symmetry of God. This new era will be defined by the measure of God and that is what He is drawing our attention to now. The symmetry of His voice is unlocking mysteries of revelation to upgrade our minds into a Heavenly governance intelligence.

“For the earth will be filled with the knowledge of the glory of the Lord as the waters cover the sea.” Hab 2:14

The time is now to get serious about not only looking into mysteries but to move into the destiny expression of a new creation.

What are the symmetries of immortality? of regeneration? These are some of the questions we must be asking.

I hope you are provoked to ask more defined questions. I hope you are provoked to listen to that Holy Spirit nudge that tells you there is more in a dream or revelation than meets the eye.

### Note:

I have not covered the many symmetries evident within the dream itself and the reoccurrence of the numbers 2 and 3 and their combinations as a thematic thread of the dream. I have also not covered the Astronomical language in the dream as far as the moon, the dark side of the moon and so forth perhaps more of that in future reports, and many other facets that would go into molecular biology. I hope to do that in the near future.
